CORNELL TO OPPOSE JUNIOR FOURS RACE

dds No Interest, but Much More Expense to Regatta, Is Ithacans' Idea.

VARSITY FOUR ATTRACTIVE

lends Variety, and Danger Is Not Present With Good Bow Oar to Guide.

Iffice, N. Y., Jan. 18.—Cornell will pose the scheme to substitute a race second eights at the intercollegiate catta on the Hudson if the matter up before the board of stewards sek at the winter meeting. The s will oppose either the substituthe second eights ruce for the the addition of the race to the programme. Although no official ement of Cornell's position has cement of Cornell's position in the board of made, it has been learned that Cor-representative on the board of ords. Dean Frank Irvine, will take ossition indicated above if the second s plan is projected.

a Cornell view is that a race for

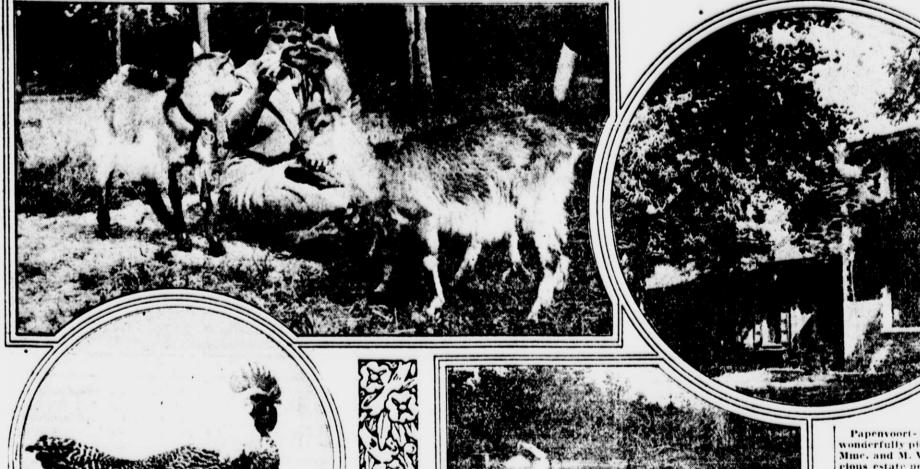

if the regation it is held that the man elights furnish all the necesinterest for a two mile race, while arsity eight oared race is sufficient to the regatta crowds all the and excitement of an eight oared mile race. The race for the varsity it is held here furnishes novelty in the crews are made up of but four nd they row without a coxswain. that a few years ago one Cornell on a buoy and was put out of has not influenced Cornell's view the Ithacans are not anxious their rowing colony on the sit is felt that they take all s felt that they take all an afford to the Hudson

EGGS BY THE DOZEN NOT BASED ON SENSE

Average Weight From Different Breeds at Ratio of Nearly 2 to 3.

The old castom of selling eggs by the dezen commenced when the eggs of the country varied but little in size or weight. In buying and selling other commodities the price is fixed by some standard weight or measure and the price is uniform. Eggs are sold by the dozen, large or small; it matters little if the eags weigh twenty ounces or if they weigh thirty ounces to the dozen. For instance, the eggs of the Hamburgs weigh twenty-one ounces and of the Minorcas weigh over thirty ounces; Minorca eggs furnish 60 per cent. more

Minorea eggs furnish 60 per cent. more food than the Hamburg eggs.

The North Carolina Experiment Station published recently some notes on the subject. The eggs of a number of hensing the subject of the eggs of a number of hensing the subject of the eggs of a number of hensing the eggs of any did the comparative value computed. The ducks' eggs, taking old and young ducks together, weighed thirty-five ounces per dozen.

The largest eggs of any breed of hensinvestigated were those of the light Brahma, weighing twenty-eight ounces a dozen, barred Plymouth Rocks and black Langshans, twenty-six ounces; white Weandottes and buff Cochins, twenty-one to twenty-three ounces a dozen. The heaviest pullet eggs were from black Minoreas, twenty-six ounces a dozen.

Papenvoort-Par-Hoogstralem, the wonderfully pictures que residence of Mme, and M. Van Schelle on her spacious estate near Antwerp, Belgium.

MANY BIRDS AND FINE ONES.

Minorea pullet eggs were from black Minorea, inventy-six ounces a dozen, white Wyandottes, black Langsham and buff Cochin pullet eggs weighted not for from twenty-four ounces a dozen. At that time all these eggs were worth lable cents in the local market.

No-Rim-Cut Tires 10% Oversize

Now a Double-Lived Non-Skid

Now our experts, who ended rim-cutting, have solved the Non-Skid problem.

It will probably double the average life of nonskids. See below.

No-Rim-Cut tires, with their oversize, save an average of 48 per cent. That saving has made these tires by far the most

popular tires in the world. Now this added saving. Note what it means on a

winter tire.

It comes in this way:

We use an extra tread made of very tough rubber. That means a double-thick tread. The blocks are deep-cut and im-

mensely enduring. They last for thousands of miles. They meet at the base, so the strain is distributed over the fabric. Old-time projections centered the strain on a small part of the fabric. These spread that strain, just as with smooth-tread tires.

That's the greatest saving. **Bulldog Grip** We present to the road surface countless edges and angles. In

every direction they grasp with a bulldog grip.
Please make a comparison with

other non-skids. One moment will show you how we have outdone them Over 200,000 are now in use.

Three Savings Now in one tire we offer a tire

that can't rim-cut-An oversize tire— An ideal Non-Skid.

Those are the reasons why Goodyear's rule Tiredom. And why last year's sales were 918,687 tires. Ask for the Goodyear Tire Book

14th year edition. It tells all
known ways to cut tire bills down.
